Elemental - 2017 Q4 Results

Rating: neutral | current price: PLN 1.42

EMT PW; EMTP.WA | Metal Recycling, Poland

Analyst: Jakub Szkopek +48 22 438 24 03

Elemental reported worse-than-expected financial results for the fourth quarter of 2017, with the disappointment made worse by the reassurance of an improved outlook given at the third-quarter earnings conference last November. The current 2018 FY consensus forecasts for Elemental are probably set for an imminent reduction.

- At PLN 374.4m, the 2017 Q4 revenue was consistent with market expectations, but EBITDA missed the mark by over 30% at PLN 12.4m even after a PLN 0.6m one-time boost. The reported EBITDA figure was lower even than the lowest of the analysts' forecasts.
- According to the bullish outlook that Elemental pitched to the market last November, aside of a promise of improvement across all core business segments in Q4, the Company gave a tentative 2018 FY guidance for a revenue of PLN 1.5bn, and a return of the yearly EBITDA margin to the 2016 level of 7.1%, implying 2018 EBITDA in excess of PLN 100m. Today, these numbers look completely unrealistic.
- Going back to the fourth quarter, Elemental generated operating cash flow of PLN 0.3m in Q4 2017 vs. PLN 5.4m in Q4 2016.
- Net debt as of 31 December 2017 stood at PLN 137.9m (2.2x 12M EBITDA) after increasing by PLN 12.6m during the fourth quarter.

Q4 2017 actuals vs. expectations

(PLN m)	Q4'17	Q4'16	change	Q4'17E	differ.	consensus	differ.	2017	2016	change
Revenue	374.4	300.8	24.4%	355.0	5.5%	364.0	2.8%	1,394.9	1,009.7	38.2%
EBITDA	12.4	16.6	-25.4%	20.4	-39.3%	18.0	-31.2%	62.2	71.4	-12.9%
EBITDA margin	3.3%	5.5%		5.7%	-	4.9%	-	4.5%	7.1%	-

Recommendations are addressed to all Clients of Dom Maklerski mBanku.

The activity of mBank S.A. is subject to the supervision of the Polish Financial Supervision Commission.

Individuals who did not participate in the preparation of recommendations, but had or could have had access to recommendations prior to their publication, are employees of Dom Maklerski mBanku authorised to access the premises in which recommendations are prepared and/or individuals having to access to recommendations based on their corporate roles, other than the analysts mentioned as the authors of the present recommendations.

This publication constitutes investment research within the meaning of Art. 36.1 of Commission Delegated Regulation (EU) 2017/565.

The compensation of the research analysts responsible for preparing investment research is determined independently of and without regard to the compensation of or revenue generated by any other employee of the Bank, including but not limited to any employee whose business interests may reasonably be considered to conflict with the interests of the persons to whom the investment research prepared by the Research Department of Dom Maklerski mBanku is disseminated. With that being said, since one of the factors taken into consideration when determining the compensation of research analysts is the degree of fulfillment of annual financial targets by customer service functions, there is a risk that the adequacy of compensation offered to persons preparing investment research will be questioned by a competent oversight body.

Strong and weak points of valuation methods used in recommendations: DCF – acknowledged as the most methodologically correct method of valuations

- acknowledged as the most methodologically correct method of valuation; it consists in discounting financial flows generated by a company; its weak point is the significant susceptibility to a change of forecast assumptions in the model.

change of forecast assumptions in the model.

Relative – based on a comparison of valuation multipliers of companies from a given sector; simple in construction, reflects the current state of the market better than DCF; weak points include substantial variability (fluctuations together with market indices) as well as difficulty in the selection of the group of comparable companies.

Economic profits – discounting of future economic profits; the weak point is high sensitivity to changes in the assumptions made in the valuation model.

Discounted Dividends (DDM) – discounting of future dividends; the weak point is high sensitivity to changes in the assumptions as to future dividends made in the valuation model.

NAV - valuation based on equity value, one of the most frequently used method in case of developing companies; the weak point of the method is that it does not factor in future changes in revenue/profits of a company.
