## Industrials Update: April 2018

### Industrials, Poland

Analyst: Jakub Szkopek +48 22 438 24 03

#### Industrials

- MSCI's Industrials World and Europe indices have seen **little movement** in April, and their current P/E and EV/EBITDA ratios are **on a level** with the respective three-year averages. **Less upbeat PMI prints** are dampening sentiment for the industrial sector.
- In Poland, **60% of the manufacturers in our coverage reported worse-than-expected financials for the fourth quarter of 2017**, the highest proportion in two years, with **positive surprises delivered by only 33%** of the sample; these included Amica, Cognor, Famur, and Pozbud. On the other hand the worst underperformers included Apator, Boryszew, Forte, Elemental, Ergis, Impexmetal, Kruszwica, Mangata, and Pfleiderer.
- When it comes to the prospects for the **2018 Q1 earnings season**, of the sixteen companies we watch, we **expect 31% to have increased profits** from the same period in 2017, with the **same proportion set to post year-over-year slowdown**. The companies **most likely to deliver a beat** include **Amica, Alumetal, Cognor, Famur, and Stelmet**. On the other hand, **Apator** will probably **fall short**.
- Our **best bet** among **mid-caps** is **Amica (AMC)**, which trades at attractive ratios compared to the sector averages ahead of a likely first-quarter rebound. We also like **Famur (FMF)**, which keeps growing its order backlog, and which gains leeway to adjust its pricing. The top pick among **small caps** is **Cognor (COG)**, which is about to finalize a financing deal with banks to replace expensive debt, alongside **Pozbud (POZ)**, trading at 4x 2019E P/E.
- The **zloty's appreciation vis-à-vis the US dollar** puts pressure on the profit margins of the exporters **Ursus**, and **Mangata** (the former is additionally hurt by increasing costs of labor and basic materials, meanwhile its trading multiples show premiums to other sector peers).
- We have made **downward adjustments** to our **2018 EBITDA** forecasts for Elemental (-18.2%), Ergis (-9.4%), Forte (-21.4%), and Pfleiderer (-4.8%).
- Polish industrial stocks are currently trading at **11.5x 2018E P/E** and **7.2x EV/EBITDA** - not particularly attractive levels given the low liquidity and cost pressures (while producer prices take a downward turn – see PPI chart on page 3) that most of these companies face this year.
- **TOP PICKS**  
**OVERWEIGHT:** AMC, FMF, COG, POZ  
**UNDERWEIGHT:** MGT

#### Chemicals

- MSCI Europe and World Chemicals Indices are currently valued at **premiums** to their 3-year average P/E and EV/EBITDA ratios, reflecting worsened sentiment due to the **euro's rise against the dollar**, combined with **appreciating energy prices** (oil, coal, gas, electricity).
- The **rising costs** of commodities is going to put a **dent** in the **2018 Q1 profits** of both Ciech and Grupa Azoty.
- **TOP PICKS**  
**OVERWEIGHT:** CIE

Copying or publishing the present report, in full or in part, or disseminating in any way information contained in the present report requires the prior written agreement of mBank S.A. Recommendations are addressed to all Clients of Dom Maklerski mBanku.

Recommendations are addressed to all Clients of Dom Maklerski mBanku.

The activity of mBank S.A. is subject to the supervision of the Polish Financial Supervision Commission.

Individuals who did not participate in the preparation of recommendations, but had or could have had access to recommendations prior to their publication, are employees of Dom Maklerski mBanku authorised to access the premises in which recommendations are prepared and/or individuals having to access to recommendations based on their corporate roles, other than the analysts mentioned as the authors of the present recommendations.

This publication constitutes investment research within the meaning of Art. 36.1 of Commission Delegated Regulation (EU) 2017/565.

The compensation of the research analysts responsible for preparing investment research is determined independently of and without regard to the compensation of or revenue generated by any other employee of the Bank, including but not limited to any employee whose business interests may reasonably be considered to conflict with the interests of the persons to whom the investment research prepared by the Research Department of Dom Maklerski mBanku is disseminated. With that being said, since one of the factors taken into consideration when determining the compensation of research analysts is the degree of fulfillment of annual financial targets by customer service functions, there is a risk that the adequacy of compensation offered to persons preparing investment research will be questioned by a competent oversight body.

#### **Strong and weak points of valuation methods used in recommendations:**

**DCF** – acknowledged as the most methodologically correct method of valuation; it consists in discounting financial flows generated by a company; its weak point is the significant susceptibility to a change of forecast assumptions in the model.

**Relative** – based on a comparison of valuation multipliers of companies from a given sector; simple in construction, reflects the current state of the market better than DCF; weak points include substantial variability (fluctuations together with market indices) as well as difficulty in the selection of the group of comparable companies.

**Economic profits** – discounting of future economic profits; the weak point is high sensitivity to changes in the assumptions made in the valuation model.

**Discounted Dividends (DDM)** – discounting of future dividends; the weak point is high sensitivity to changes in the assumptions as to future dividends made in the valuation model.

**NAV** – valuation based on equity value, one of the most frequently used method in case of developing companies; the weak point of the method is that it does not factor in future changes in revenue/profits of a company.
