VRG - 2Q'20 Results in line with Preliminary Results

Rating: accumulate | target price: PLN 2.43 | current price: PLN 2.36

VRG PW; VRGP.WA | Retail, Poland Analyst: Piotr Bogusz +48 22 438 24 08

- VRG reported Q2'20 results in line with initial estimates of revenue/EBIT/net profit.
- Revenues from sales dropped by 35% y/y to PLN 174.9m in Q2'20, and sales per-square-meter fell y/y in all brands (the lowest drop y/y was recorded in the Wólczanka brand at -26% in Q2'20).
- The quarterly gross margin fell by 6.6ppts y/y to 46.9% in Q2'20, which was a result of the deterioration of profitability in the fashion segment (-8ppts y/y) and the deterioration of profitability in the jewelry segment. (-3.7pp y/y). The drop in profitability results mainly from the increase in the share of e-commerce in sales and higher discounts y/y.
- In Q2'20, SG&A expenses amounted to PLN 82.7m (-28%). The cost of SG&A/sqm dropped by 29% y/y, which is a result of a 31% y/y drop in the cost of shops/ sqm and a 21% y/y drop in the cost of head office/sqm. The y/y decrease in SG&A expenses was mainly due to savings in personnel costs and the calculation of rents from 4 May.
- EBIT amounted to PLN -10.4m in Q2'20 vs. PLN 28.6m in Q2'19. EBIT in Q2'20 was burdened with a PLN 13.9m inventory provision and a PLN 7.8m grant from the SME Fund. The clothing segment's operating loss was PLN 16.3m in Q2'20 (vs. PLN 18.7m profit in Q2'19), and the jewelry segment's earnings fell to PLN 4.9m in Q2'20 (vs. PLN 10m in Q2'19).

- Operating cash flow amounted to PLN 64.4m in Q2'20 (after IFRS 16) vs. PLN 27.5m in Q2'19. OCF improved due to lower inventory growth and lower receivables. Inventories per square meter were 3% y/y lower than at the end of Q2'20 and amounted to 9 209 PLN. Net debt (net debt cleared under IFRS 16) was PLN 79.3m at the end of Q2'20 vs. PLN 150m at the end of Q2'19. The net debt/EBITDA ratio was 1.1x at the end of Q2'20.
- To sum up, VRG's earnings are in line with the company's preliminary estimates. In Q2'20, the VRG recognized a high write-down on inventories from previous collections, while costs were lower y/y thanks to cost savings (mainly personnel costs), subsidies and partial non-payment of rents. Given the progressing recovery of sales y/y in the following months of Q2'20 and July 2020, we expect the scale of the y/y decline in Q3'20 to be significantly reduced.

2020 Q2 actuals vs. expectations and preliminary results

("Cabrera"). Transactions in securities discussed in this research report should be effected through Cabrera or another U.S. registered broker dealer.

Strong and weak points of valuation methods used in recommendations: DCF – acknowledged as the most methodologically correct method of valuati

valuation; it consists in discounting financial flows generated by a company; its weak point is the significant susceptibility to a change of forecast

assumptions in the model.

Relative – based on a comparison of valuation multipliers of companies from a given sector; simple in construction, reflects the current state of the market better than DCF; weak points include substantial variability

(fluctuations together with market indices) as well as difficulty in the selection of the group of comparable comparable companies.

Economic profits – discounting of future economic profits; the weak point is high sensitivity to changes in the assumptions as to future dividends (make the profit of the profit

NAV - valuation based on equity value, one of the most frequently used method in case of developing companies; the weak point of the method is that it does not factor in future changes in revenue/profits of a company.
