## WHAT IS THIS PRODUCT?

### Type:

This product is a UCITS exchange traded fund. It is a sub-fund of ARK Invest UCITS ICAV (the "ICAV"), an open-ended Irish collective asset management vehicle with variable capital and segregated liability between its sub-funds and registered in Ireland and authorised by the Central Bank of Ireland as a UCITS.

### Term:

This product is not subject to any fixed term.

### Objectives:

This Fund is passively managed and aims to replicate the performance of the Fofberry SMS Global Sustainable Infrastructure USD Net Total Return Index (the "Index"). The Index is designed to provide exposure to companies supporting global infrastructure development in a way that balances economic, environmental and social objectives. The Index seeks to capture companies involved in maintaining and upgrading the existing infrastructure of more industrialised economies, as well as companies developing the new infrastructure required for the economic advancement of less industrialised economies. The investment categories of the Index include (1) Transportation Infrastructure, (2) Environmental Infrastructure, (3) Data and Telecom Infrastructure and (4) Social Infrastructure. The Index selects companies according to their relative contribution to environmental and social objectives in the geographical regions that they serve and taking into account their relative volatility (the degree to which each company's share price changes over time), with minimum requirements for market capitalization (company size) and liquidity (how readily a company's shares are traded) also applied. The Index weights companies according to their relative contribution to sustainable infrastructure, ESG performance and financial strength. The Index is rebalanced on a semi-annual basis. The Fund will primarily invest in the companies contained in the Index in similar proportions to their weightings in the Index.

### Intended Retail Investor:

A typical Investor would be one who is a private or institutional investor and is seeking capital appreciation over the long term. Such an Investor is also one that is able to assess the merits and risks of an investment in the Shares of the relevant Class of the Fund.

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### Risk indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

**We have classified this product as class 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the fund to pay you.**

**The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.**

The Fund may be subject to the risks associated with infrastructure related investments including fluctuating energy prices which impact revenues, weather fluctuations that impact electricity generation and the risk that existing supportive regulatory frameworks for infrastructure projects become less supportive or are delayed or cancelled.

The Fund may also be subject to emerging market risks including: (i) political and economic risks; (ii) counterparty risk and liquidity risks; (iii) legal risks; (iv) reporting and valuation risks; (v) exchange control and repatriation risks; (vi) settlement risks; and (vii) custody risks. Some companies may be smaller and less experienced companies, with limited product lines, markets or financial resources and fewer experienced management or marketing personnel. They may experience extreme price and volume fluctuations that are often unrelated to their operating performance.

The Index consists of a mix of micro, small, mid, and large capitalization companies. Micro and small companies are particularly susceptible to adverse events, may perform worse than larger companies, and are more prone to market volatility and erratic price changes due to lower trading volumes and liquidity.

The Fund invests in global equity securities. As such there is a risk of loss arising from exchange rate fluctuations or exchange control regulations.

Other risks include: the potential bankruptcy of third-party service providers like the ICAV's depository, leading to financial losses; the possibility of the Index provider ceasing calculations or terminating the Fund's license, possibly requiring the Fund's closure; and challenges in trading Fund Shares at prices close to the Net Asset Value. There is no capital guarantee or protection on the value of the Fund and investors can lose all the capital invested in the Fund. Please refer to the "Risk Factors" section of the ICAV's Prospectus and the Fund Supplement.

### Performance scenarios

**What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.**

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 5 years Investment 10 000 USD			
Survival Scenarios Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		If you exit after 1 year	If you exit after 5 years (recommended holding period)

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: This type of scenario occurred for an investment between 01/2024 and 06/2025.

Moderate: This type of scenario occurred for an investment between 06/2020 and 05/2025.

Favourable: This type of scenario occurred for an investment between 11/2017 and 10/2022.

## WHAT HAPPENS IF IQ EQ FUND MANAGEMENT (IRELAND) LIMITED IS UNABLE TO PAY OUT?

The Fund is a sub-fund of ARK Invest UCITS ICAV (the "ICAV"), an umbrella Irish collective asset-management vehicle which is a separate entity distinct from IQEQ Fund Management (Ireland) Limited (the "Manager"). The assets of the Fund are held in safekeeping by the ICAV's depository, Northern Trust Fiduciary Services (Ireland) Limited (the "Depository"). In the event of the insolvency of the Manager, the Fund's assets in the safekeeping of the Depository will not be affected. However, in the event of the Depository's insolvency, or someone acting on its behalf, the Fund may suffer a financial loss. However, this risk is mitigated to a certain extent by the fact the Depository is required by law and regulation to segregate its own assets from the assets of the Fund. The Depository will also be liable to the Fund and the investors for any loss arising from, among other things, its fraud, wilful default (intentional failure to perform its obligations) or negligence. As a shareholder in the Fund, there is no compensation or guarantee scheme in place

## WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment. We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

### Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- USD 10 000 is invested.

Investment 10 000 USD	If you exit after 1 year	If you exit after 5 years
<b>Total costs</b>	<b>46 USD</b>	<b>421 USD</b>
Annual Cost Impact*	0.46 %	0.52 %

\*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 13.15% before costs and 12.63% after costs.

### Composition of Costs

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MY MONEY OUT EARLY?

---

### Recommended minimum holding period: 5 years

The above mentioned period has been defined in accordance to the product characteristics. It is determined on the basis of the product's risk and reward profile. Your ideal holding period may be different from this minimum recommended holding period. We recommend that you discuss this with your advisor. If the holding period is shorter than the recommended minimum, this may have a negative impact on the product's risk and reward profile. Shares in the product can be sold by ordinary investors using an intermediary (e.g. a stockbroker, or retail investment platform) when the stock markets on which the shares are traded are open. An intermediary is likely to apply a commission to purchases and sales of shares in the product.

## HOW CAN I COMPLAIN?

---

Complaints made be submitted to the Manager, IQ EQ Fund Management (Ireland) Limited, by email ([ManCo@iqeq.com](mailto:ManCo@iqeq.com)) or telephone (+353 1 673 5480).
