Weekly Commodity Roundup

Analysts: Kamil Kliszcz +48 22 438 24 02, Jakub Szkopek +48 22 438 24 03

Utilities

EEX contracts retreated close to €40/MWh over the week, in step with a drop in carbon allowances below €36/t, underpinned by downward-trending prices ARA coal. Polish year-ahead power contracts are also down by about 20 zlotys at PLN 230/MWh, with means DCS remain squeezed even though emissions have become cheaper.

Nevertheless world utility indices continued to move higher over the week, and month-to-date we are seeing positive returns of 6% on EU stocks and 8% on their US peers. Polish generators remain under pressure as Poland seeks the approval of the European Union to provide state aid to our biggest coal producer, PGG, to help further its plan for gradual mine closures.

Gas & Oil

Markets are taking notice of negative shifts in crude, and so refining margins are rebuilding at more than \$2/bbl today. With a larger supply of sour crudes the Urals/Brent differential is probably set to widen from the current \$0.4. In petrochemicals, profits remain squeezed across the whole product mix. Gas prices have stabilized after weeks of upwards movement, with next month's deliveries perched at ~€14/MWh.

Coking Coal

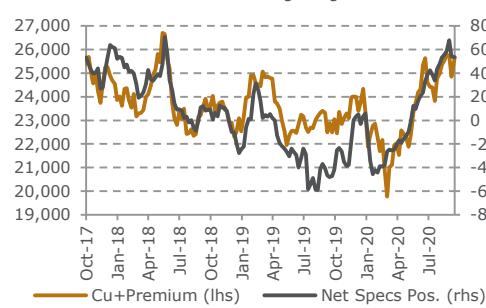

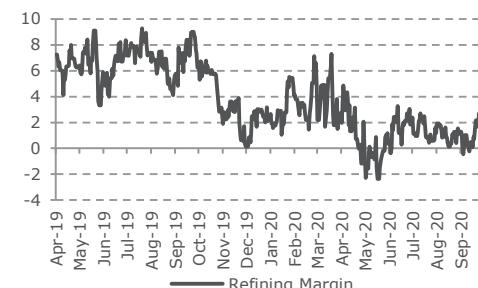

The coking coal market got sidelined briefly at the start of the week after reports emerged that Chinese customs authorities had ordered several state-owned steel mills and power plants to immediately halt coal imports from Australia. If these reports are confirmed, this could put a damper on the prices of metallurgical coal, and with them the shares of its producers, including JSW. The implications of a potential Chinese import ban are mitigated somewhat by forecasts of average-to-above-average cyclone activity in the Australian region in the November-April tropical cyclone season.

Agricultural Commodities

World prices of wheat and corn have rallied to \$220/t in the past week – the highest level since 2012, buoyed by the USDA's crop supply update last Friday. Rising crop prices make for a more bullish outlook for the farmland business of Kernel and Astarta. The latter is also still benefitting from upward-trending global prices of sugar.

On the other hand, the fertilizer industry, represented among others by Grupa Azoty and Yara, are squeezed by increasing prices of natural gas.

A widening of cracking spreads

As refiners take a step back and let petroleum stocks dwindle, more space has opened for cracking margins to grow, with even more room likely to be created by further downward correction in crude as supply from OPEC+ and Libya increases. For PKN Orlen, last week the model refining margin per barrel of product crossed \$2.

Copper speculators keep positions high

Open positions in copper remain at a stable but high 54,000 contracts, which suggests that the market is close to a tipping point. At the moment traders are focused on recovering global stocks and uncertainty about a new stimulus package in the US, and they are watching for potential supply disruptions as labor talks at major mines in Chile produce varying outcomes.

The activity of mBank S.A. is subject to the supervision of the Polish Financial Supervision Commission.

Individuals who did not participate in the preparation of recommendations, but had or could have had access to recommendations prior to their publication, are employees of Biuro maklerskie mBanku authorised to access the premises in which recommendations are prepared and/or individuals having to access to recommendations based on their corporate roles, other than the analysts mentioned as the authors of the present recommendations.

This publication constitutes investment research within the meaning of Art. 36.1 of Commission Delegated Regulation (EU) 2017/565.

The compensation of the research analysts responsible for preparing investment research is determined independently of and without regard to the compensation of or revenue generated by any other employee of the Bank, including but not limited to any employee whose business interests may reasonably be considered to conflict with the interests of the persons to whom the investment research prepared by the Research Department of Biuro maklerskie mBanku is disseminated. With that being said, since one of the factors taken into consideration when determining the compensation of research analysts is the degree of fulfillment of annual financial targets by customer service functions, there is a risk that the adequacy of compensation offered to persons preparing investment research will be questioned by a competent oversight body.

For U.S. persons only: This research report is a product of mBank SA which is the employer of the research analyst(s) who has prepared the research report. The research analyst(s) preparing the research report is/are resident outside the United States (U.S.) and are not associated persons of any U.S. regulated broker-dealer and therefore the analyst(s) is/are not subject to supervision by a U.S. broker-dealer, and is/are not required to satisfy the regulatory licensing requirements of FINRA or required to otherwise comply with U.S. rules or regulations regarding, among other things, communications with a subject company, public appearances and trading securities held by a research analyst account.

This report is intended for distribution by mBank SA only to "Major Institutional Investors" as defined by Rule 15a-6(b)(4) of the U.S. Securities and Exchange Act, 1934 (the Exchange Act) and interpretations thereof by U.S. Securities and Exchange Commission (SEC) in reliance on Rule 15a-6(a)(2). If the recipient of this report is not a Major Institutional Investor as specified above, then it should not act upon this report and return the same to the sender. Further, this report may not be copied, duplicated and/or transmitted onward to any U.S. person, which is not the Major Institutional Investor.

In reliance on the exemption from registration provided by Rule 15a-6 of the Exchange Act and interpretations thereof by the SEC in order to conduct certain business with Major Institutional Investors, mBank SA has entered into an agreement with a U.S. registered broker-dealer, Cabrera Capital Markets. ("Cabrera"). Transactions in securities discussed in this research report should be effected through Cabrera or another U.S. registered broker dealer.

Strong and weak points of valuation methods used in recommendations:

DCF – acknowledged as the most methodologically correct method of valuation; it consists in discounting financial flows generated by a company; its weak point is the significant susceptibility to a change of forecast assumptions in the model.

Relative – based on a comparison of valuation multipliers of companies from a given sector; simple in construction, reflects the current state of the market better than DCF; weak points include substantial variability (fluctuations together with market indices) as well as difficulty in the selection of the group of comparable companies.

Economic profits – discounting of future economic profits; the weak point is high sensitivity to changes in the assumptions made in the valuation model.

Discounted Dividends (DDM) – discounting of future dividends; the weak point is high sensitivity to changes in the assumptions as to future dividends made in the valuation model.

NAV – valuation based on equity value, one of the most frequently used method in case of developing companies; the weak point of the method is that it does not factor in future changes in revenue/profits of a company.
